

Tips for Test Taking with Extended Time at Home

Your unit exams will continue to be delivered using ExamSoft. Thus, your exams should still build in your correct time extension. **It is your responsibility to review your test time at the beginning of the exam to ensure you have the correct amount of time.** Additionally, we recommend that you:

- Set aside extra time before your exam time to ensure that you can gather your necessary materials and get settled for the duration of your exam. Remember, there is no way to pause your exam so any restroom breaks will take away from your testing time.
- Find a location in your home in which to take your exams that is comfortable enough to work for prolonged amounts of time but is supportive enough to keep you active and focused.
- Find a location in your home in which to take your exams that is removed from distractions as much as possible and ask others in your household to respect your testing needs for the duration of your testing time. Earplugs may help combat noise.
- Ensure that your laptop or computer is plugged in to a power source and has a strong internet connection.
