

Policy Name: Curriculum Planning

Policy Number: ACA 3.02

Title of Policy Owner: Dean of Academic Affairs

Approved by: Policy Committee/Administrative Cabinet

Effective Date: 08/01/2020

Version: 1.0

Policy Status: Approved

I. Policy

Curriculum Planning

II. Purpose

The purpose of this policy is to provide guidelines for planning student progression through the Pre-Licensure BSN and Post-Licensure RN-BSN programs. The programs publish suggested curriculum plans that illustrate the sequencing of courses in a manner that represents pre- and co-requisite course requirements.

III. Scope

This policy applies to all students of BSMCON as defined.

IV. Definitions

None

V. Policy Details

Pre-Licensure BSN Curriculum Plan

Upon admission, each student is registered for all courses on the curriculum plan. Students who remain registered in the originally scheduled plan will have guaranteed matriculation in the program. Students who veer from that original registration plan will collaborate with their advisor to revise their registration plan. The revised registration plan is subject to approval of the Pre-Licensure BSN Program Chair. If the revised plan is approved, the student will be re-registered for all courses on the revised plan.

Once admitted to the program, each student will request the specific upper level general education courses, nursing elective, and population health

practicum of their choice. Each course has specific required pre-requisites and will have space limitations.

Post-Licensure RN-BSN Curriculum Plan

Upon admission, each student will collaborate with their advisor to establish a mutually agreed upon curriculum plan and register for all courses within the curriculum. A student may change their registration plan as needed following the add/drop and pre- and co-requisite guidelines.

Once admitted to the program, each student will request the specific upper level general education courses and nursing elective of their choice. Each course has specific required pre-requisites and will have space limitations.
